East Mississippi Chapter of the NWA/AMS

The stated goal of our organization is to "bring all those in Eastern Mississippi interested in weather together as a group". Throughout the history of the organization, we have not only sustained our mission but expanded upon it. The chapter is involved with school weather awareness, partnering with MyWarn to help get the word out when severe weather is imminent. Student members are also partnering with the National Weather Service in Memphis, TN, on a mobile sounding project which helps in decision support on severe weather days. The chapter members have been proud planners of the Southeast Severe Storms Symposium, held at Mississippi State University for the past ten years.

Education is also a high priority for the chapter. Chapter members have attended talks presented by employees of the National Weather Service, broadcasters from around the region, and private sector meteorologists. In addition, the chapter travels to NWA and AMS conferences yearly to both present and listen to presentations.

Local Airport

Golden Triangle Regional Airport (GTR) in Columbus, MS.

Daily flights offered by Delta. Transportation to and from the airport will be provided along with transportation from the hotels to Symposium events. For transportation information, contact Barrett Gutter (head of Transportation Committee) at bfg23@msstate.edu.
